INDEX

PETROLEUM REFINER

SPECIALIZED FOR THE MANUFACTURING DIVISION OF THE PETROLEUM INDUSTRY, REFINING, PETROCHEMICAL PROCESSING, CYCLING AND NATURAL GASOLINE OPERATIONS

A Gulf Publishing Company Publication

1947 . . . Volume 26

NOTE: The index immediately following refers principally to the technical or feature articles which appeared during 1947 and are designated by a continuous system of numbering from page 1 to page 835, included, of course, are the contents of *The Process Handbook* which appeared as Section I of the April issue. For the complete contents of Volume 26, the index immediately following should be read in connection with the Index of News, Statistical and Service Features which appears on page vii. Page references to this latter index are on a month-to-month numbering basis.

A

Absorption, iv 331.
Absorption, increase in propane recovery, vii 592.
Absorption Oil Purifying System, iv 184.
Absorption, Propane Recovery Process, iv 200.
Absorption, Tulsa Type Process, iv 243.
Acetic Acid from Alcohol Process, iv 166.
Acid, Alkylation, Regeneration Process, iv 170.
Acid sludge, from treatment of cracked shale gasoline, vii 574.
Accurate Particle-Size Determination of Fluid Catalyst by Coordination of Boiler Analysis and Microscopic Examination—John T. Wiley, Joe E. Deloney, S. Walter Denton, xii 786.
ADAMS, B. G.—
Evaluation of Crude Oils for Production of Straight-Run Aviation Gasolines, ii 96.
ADAMS, G. R.—
Velocity Sizing of Water Lines, iii 153.
Additives, lubricants, iii 111.
Adsorptive Gas Dehydration Process, iv 158.
Air-Cooled Condensers, ii 79.
Air-Cooled Heat Exchangers, ii 79.
ALBRIGHT, JOHN C.—
Union Oil Company Produces High-Melting Paraffin Waxes from Lubricating Oil Cuts, vii 609.
ALBRIGHT, R. H.—
(Co-author) Factors Affecting Quality and Supply of Internal-Combustion-Engine Fuels, v 447.
ALEXANDER, GORDON W.—
Aluminum Used in Combatting Tank Corrosion, xii 795.
Alignment Chart for Calculating Allowable Vapor Velocity in Plate Towers—William C. Frisbe, vii 593.
Alkylation, Catalytic Process, iv 180; Perco HF Process, iv 230; UOP Paraffin Processes, 354.
Alkylation Acid Regeneration Process, iv 170.
ALLEN, CLYVE—
Estimation of Hydrogen Content of Gasoil, ii 86.
ALLEN, R. C.—
(Co-author) Natural Gasoline Looks Ahead, v 459.
Allowable vapor velocity in fractionators, vii 593.
Aluminum Used in Combatting Tank Corrosion—Gordon W. Alexander, xii 795.
American Petroleum Institute, i 27.
American Society of Mechanical Engineers, Fuels Division, iii 129.
Ammonia from Natural Gas, iv 172.
Analysis and Properties of German Synthetic Polyethylene Oils, C. M. Murphy and C. E. Saunders, v 479.
Analysis of Stresses in U-Bend Pipe Frame—Jesse Yeakel, iii 147.
Analysis of Stresses in Unsymmetrical Pipe Frame—Jesse Yeakel, vi 541.
ANDRY, PAUL L., JR.—
Power Plant Design for an Expanding Refinery, xi 728.
ANGELL, ROBERT F.—
(Co-author) Maintenance of Pressure Gauges, xi 773.
ANVORN, T. L.—
(Co-author) Factors Affecting Quality and Supply of Internal-Combustion-Engine Fuels, v 447.
Application of Automatic Controls to Gasoline Plant and Refinery Processing—E. H. Reynolds, William Troutman and Gordon Tawn, iv 422.
Application of Thermodynamics to Hydrocarbon Processing—Wayne C. Edmister. Chapter 1, Introduction and summary, vii 565; Chapter 2, Basic definitions and concepts, viii 635; Chapter 3, Energy and entropy functions, ix 689; Chapter 4, The perfect gas, x 735; Chapter 5, Non-hydrocarbon fluids, xi 742; Chapter 6, Illustrative problems and solutions, xii 803.
Application of Viscosity Measurement in Petroleum Refining Operations—D. J. Pompeo, xi 733.
Arkansas Fuel Oil Company, xi 778.
Aromatic Adsorption Index as a Rapid Method for Approximating Catalyst Activity—W. W. Scheumann, A. H. Rescorla, xii 815.
Aromatic groups in petroleum lubricants, ii 101; iii 144.
Aromatic Hydrocarbon, Physical Properties, iii 107.
Asphalt, i 1.
Atlantic Refining Company, The, iv 269; v 493; xi 719.
Aurora Gasoline Company's new fluid catalytic cracking unit, ix 705.
ATTAWAY, DON—
Safe Practices for Steam Boiler Operation, xi 778.
Azeotropic Fractionation Process, iv 174.

B

Badger & Sons Company, E. B., iv 167; iv 209; iv 257; iv 259; iv 289; iv 293; iv 325; iv 325.
BARR, W. E.—
The Glass-Blowing Art in Petroleum Research, ii 73.
BARTH, E. J.—
(Translator) (Translation) Chemical Constitution and Aromatic Groups in Petroleum Lubricants, ii 101; iii 144.
Basic Petroleum Chemistry for Refinery Employes—Chapter VIII—Petrochemicals—J. J. Stadtherr, i 39; Chapter IX—Potential Sources of Liquid Fuel, iii 137; Chapter X—The Refining of the Future, iv 427.
Bench-Scale Method for Determining Activity of Cracking Catalysts in Powdered Forms—Hubert McReynolds, xii 780.
BENT, R. D.—
(Co-author) Where Does the Sulfur Go? xi, 719.
BERTETTI, J. W.—
Simple Automatic Composite Sampling, iii 157.
Bitumen, i 1.
Bleeder Constantly Removes Light Gases from Propane Refrigerant, v 512.
Blowdown system design, vi 519.
Blowoff system for boilers, calculation of heat recovery, vii 595.
BLUDWORTH, J. E.—
Chemicals from Petroleum, iv 410.
Boilers, xi 778.
Boiling Coefficients for Finned Tubes—Donald L. Katz, viii 620.
BOLT, JOHN A.—
Copper Strip Corrosion Tests, viii 660.
BONDI, A.—
Physical Chemistry of Lubricating Oils—Part v. The Statistical Analysis of Lubricating Oils, iii 148; Part vi, vi 546.
Born Engineering Company, iv 203.
BOVAY, H. E., JR.—
A Change House Ventilation Design for the Gulf Coast, x 771.
BOYD, DAVID M.—
Fractionator Pressure Control, ii 83.
Brennst. Chem., ii 101; iii 144.
BROOKS, W. B.—
(Co-author) High Range Vapor Pressures and Antoine Equation Constants of some C3 and C5 Hydrocarbons, xii 818.
BRUMBAUGH, A. E., JR.—
Smokeless Burning of Refinery Vent Gases, iii 133.
Bureau of Standards, see National Bureau of Standards.
Burners, Refinery Gas Fuel, ii 51.
Butadiene Process, iv 176.
Butane Isomerization Process, (Kellogg) iv 178.
BUTTRILL, CARROLL O.—
Engineer Training Methods, v 491.

C

CAESAR, C. H.—
The Suspensoid Catalytic Cracking Process, x 727.
Calculated Theoretical Increase in Propane Absorption by Lowering Lean Oil Molecular Weight—R. M. Stewart and A. M. Hegwer, vii 592.

See News, Statistical and Service Features Index below.

Calculation of Concentration Change—By William C. Frisbe, ix 712.
Calculation of Heat Recovery at Cities Service Refinery with Continuous Blowoff System—M. C. McKeown, vii 595.
Calorific values of refinery gases, ii 51.

CAMP, E. Q.—
Sour Crudes—Equipment Protection, xii 796.

CANNON, M. E.—
(Co-author) A Modern Constant Temperature Bath, ii 93.
Carbide and Carbon Chemicals Corporation, iv 189.
Caska Corporation's Quitman Gasoline Plant, iv 417.
Catalyst regeneration, vi 551.
Catalysts, ix 663; xii 786, 790, 815.
Catalytic Alkylation Process, (Kellogg) iv 186.
Catalytic Cracking, see Cracking, Catalytic.
Catalytic Desulfurization Process, (UOP) iv 184.
Catalytic Polymerization Process, (Kellogg) iv 186.
Catalytic Section Flow Diagram. (TCC) viii 641.
Challenge to Crude Oil—L. J. Logan, Dec. 145.
A Change House Ventilation Design for the Gulf Coast—By H. E. Bovay, Jr., x 731.

CHAPIN, W. F.—
High Purity Natural Gas by the Glycol-Amine Process, vi 537.
Chemical Constitution and Aromatic Groups in Petroleum Lubricants—C. Zerbe and K. Falkena, ii 101; iii 144.
Chemical Construction Corporation, iv 171.
Chemicals from Petroleum—H. R. Smoley, R. M. Torrey, and L. Kniel, xi 766.
Chemicals From Petroleum—J. E. Bludworth, iv 410.
Chemistry iv 427.
Chlorex Solvent Refining Process, iv 138.
Chlorinated phenol derivatives, v 492.

CICALESE, J. J.—
(Co-author) Study of Alkylation-Plant Isobutane Tower Performance, v 495.
Cities Service Refining Corp., xii 815.

CLEGG, F. R.—
(Co-author) Investigation of a Girbotol Unit Charging Cracked Refinery Gases Containing Organic Acids, xi 730.
Closed Vent System Increases Plant Operating Safety Factor—By R. G. Murray, Jr., x 720.
CO_2 Removal from natural gas, vi 537.
Cobalt Molybdate Desulfurization Process, iv 180.
Coking, i 8.
Coking, Thermal Delayed Process, iv 196; iv 328.
Coal gasification, Dec. 145*.
Coles Levee Cycling Plant Includes Advanced Design Technique—C. C. Pryor, i 48.
Color measurements, ii 90.
Color of Petroleum Oils—V. A. Kalichevsky, ii 89.
Colorimeters, ii 91.
Combustion, ii 51.
Combustion of Coke Deposit on Synthetic Bead Catalyst—W. A. Hagerbaumer and Russell Lee, vi 551.
Condensers, Air Cooled, ii 79.
Conservation of petroleum products, v 454.
Continuous Contact Filtration, (Filtrol) iv 192.
Control Equipment for Hazardous Locations—B. M. Mimken, xi 754.
Control of Light Hydrocarbon Fractionators Subject to Variations in Feed Composition and Quantity—By E. D. Mattix, ix 714.
Control of Vertical Heaters in Gasoline Plant Operation—J. M. Sappington, viii 631.

CONWAY, M. J.
Equipment for Low Cost Oxygen Production, vi 557.
Cooling towers, iv 189.
Cooling water, determination of phenol derivatives, v 492.
Copper Strip Corrosion Tests—By John A. Bolt, viii 660.
Copper sweetening process, (Linde) vi 562.
Corrosion, xii 795; xii 796.
Corrosion, non-ferrous pipe minimizes in sludge plant, iii 160.
Corrosion Studies for the Petroleum Refining Industry—F. A. Rohrman. Chapter 1, The economic aspects of corrosion, vi 513; Chapter 2, Factors affecting corrosion, vii 531; Chapter 3, Corrosion tests, viii 651.
Cracking, catalytic—Pilot Plant, ii 85, 99; regeneration of spent fluid catalyst, iii 139.
Cracking, Catalytic, Process UOP iv 183; Fluid Process, (Kellogg) iv 216; Fluid Process, (Standard Oil Development) iv 218; Houdry Fixed-Bed Process, iv 224; Perco Cycloversion Process, iv 278; Thermofor Process, iv 332.
Cracking, catalytic vs. stopgap processes, v 467.
Cracking, catalytic, unit drain systems, vi 623.
Cracking, catalytic, catalyst regeneration, vi 551.
Cracking, Catalytic, viii 640; ix 704; x 727; xi 734; xii 781; xii 786; xii 790; xii 815.
Cracking, Thermal, Donnelly Process, iv 200; Naptha and Gasoil Polyforming Process, iv 264; Selective Processes, 302; UOP Process, iv 356.
Cracking Sulfur Stocks with Natural Catalyst—By R. C. Davidson, ix 663.
Critical-Temperature and Latent-Heat Equations, iii 107.
Crude oil, Dec. 145*.
Crude oil, evaluation, ii 96.
Curve Fitting and Surface Fitting—George H. Hanson, vii 571.
Custom Building Lubricants with Additives—F. L. Matthews, iii 111.
Cycling, i 45.
Cycling plants instrumentation, ix 699.

D

DANIELS, L. S.—
Shell Incorporates Design Refinements in Fluid Catalytic Unit at Deer Park, ii 65.

DARLING, P. E.—
Internally Insulated Piping and Pressure Vessels for High-Temperature Service, x 765.

DAVIDSON, R. C.—
Cracking Sulfur Stocks with Natural Catalyst, ix 663.

DAVIS, J. A.—
(Co-author) Miscellaneous Fractioning Techniques, iv 431; Study of Alkylation-Plant Isobutane Tower Performance, v 495.
Deasphalting, Propane Process, iv 292; Propane Process, iv 294; Probane Decarbonizing Process, iv 296.

DeFLON, JAMES G.—
Evaluating Cooling Tower Performance for the Process Man, iv 399.
Dehydration, iv 231; iv 407.
Dehydration, Adsorptive Gas Process, iv 168; Diethylene Glycol Process, iv 198.
Dehydrogenation, Houdry Process, iv 232; UOP Catalytic Process, 348.
De Laval Acid Treating Process, iv 194.
De Laval Separator Company, iv 195.
Delayed Coking, i 8.
Delayed Coking Process, (Kellogg) iv 196.
Delayed Coking Unit at General Petroleum Corporation's Torrence Refinery—Randal Maase and R. E. Lauterbach, i 8.

DELONEY, JOE E.—
(Co-author) Accurate Particle-Size Determination of Fluid Catalyst by Coordination of Roller Analysis and Microscopic Examination, xii 786.

DENTON, S. WALTER—
(Co-author) Accurate Particle-Size Determination of Fluid Catalyst by Coordination of Roller Analysis and Microscopic Examination, xii 786.
Desalting, Petreco Electrical Process, iv 334; Tretolite Process, iv 340.
Design and Operation of A Small-Scale Thermofor Catalytic Cracking Unit—George Kelso, C. C. Peavy, G. D. Myers, and A. W. Hoge, viii 640.
Desulfurization, Catalytic Process, iv 184; Cobalt Molybdate Process, iv 180; Gray Catalytic Process, iv 226; Perco Catalytic Process, iv 272.
The Determination of Chlorinated Phenol Derivatives in Treated Cooling Waters—C. E. Headington and W. A. Sassaman, v 492.
Determination of Sulphur in Caustic Scrub, iii 162.
Dewaxing, Propane Process, iv 298; Sharples Bari-Sol Process, iv 306; Sharples Naptha Process, iv 308; Solvent Process, iv 320.
Diethylene Glycol Process, iv 198.
Distillation, viii 648.
Distillation, (also see Fractionation) Dual-Flo, Process, iv 202; Lubricating Oil Rerun Process, iv 262; Three-Stage (Badger) Process, iv 334; Three-Stage Distillation (Foster-Wheeler) iv 336; Three-Stage Distillation (Lummus) iv 338; Two-Stage Process, iv 344.
Distillation Properties of Aromatic Hydrocarbons—John A. Griswold and J. A. May, iii 107.
Donnelly Cracking Process, iv 200.
Donnelly Process Corporation, iv 201.

DONOHUE, DANIEL A.—
Heat Transfer Coefficients for Condensing Hydrocarbon Vapors, viii 668.

D'OUVILLE, EDMOND L.—
(Co-author) The Use of Thermal Conductivity Cells for Gas Analysis in Studying the Fischer-Tropsch Synthesis of Hydrocarbons, vi 526.
Dow Chemical Company, iv 207.
Dow Chemical Company, Styrene Division, iii 107.
Dow Styrene Process, iv 206.
Drains, safe arrangement, vi 619.
Dual Control System Synchronizes Compressor Speed-Intake Gas Pressure—J. M. Sappington, iv 378.
Dual-Flo Distillation Process, iv 202.

DURHAM, E.—
(Co-author) Some Practical Applications of Flue-Gas Recirculation, i 23.
Duo-Sol Solvent Extraction Process, iv 204.
Standard Oil Company (Indiana), iv 251, 253, 255.
Standard Oil Company (Indiana), vi 519; vii 577.
Standard Oil Company (Indiana), catalyst regeneration, iii 129.

E

EDMISTER, WAYNE C.—
Applications of Thermodynamics to Hydrocarbon Processing. Chapter 1, Introduction and summary, vii 565; Chapter 2, Basic definitions and concepts, viii 625; Chapter 3, Energy and entropy functions, ix 689; Chapter 4, The perfect gas, x 735; Chapter 5, Non-hydrocarbon fluids, xi 742; Chapter 6, Illustrative problems and solutions, xii 809.
Edeleanu Process, iv 208.
Effect of Leakage Around Cross-Baffles in a Heat Exchanger—By A. M. Whistler, x 750.
Electrical Switchgear, xi 754.

EMERT, F. L.—
Lion Oil Company Starts Operation of TCC Unit, xii 781.
Empirical equations, vi 534.
Employe training methods, v 491.
Emulsion breaking, viii 656.
Engineer Training Methods—Carroll O. Buttrill, v 491.
Equipment for Low Cost Oxygen Production—M. J. Conway, vi 557.
Estimation of Hydrogen Content of Gasoils—Clyve Allen, ii 16.
Estimation of Properties of Solvent-Refined Products—V. A. Kalichevsky, i 17.
Ethylene Manufacturing Process, (Lummus) iv 210.
Ethylene Production Process, (Stone & Webster) iv 212.
Evaluating Cooling Tower Performance for the Process Man—James G. DeFlon, iv 399.
Evaluation of Crude Oils for Production of Straight-Run Aviation Gasolines—B. G. Adams, ii 96.
Examination of Acid Sludge from the Treatment of Cracked Shale Gasoline—George E. Mapstone, vii 674.

F

FABIAN, C. M.—
Roof Steam Coils Eliminate "Cloud" in Lubricating Oil Storage, iii 141; Feb. 140*.
Factors Affecting Quality and Supply of Internal-Combustion-Engine Fuels—By William M. Holaday, and Others, v 447.
Factors Affecting the A.P.I. Design of Separators for Removal of Oil from Waste Water Effluents—Sheppard T. Powell and E. L. Knoedler, Jr., v 485.

* See News, Statistical and Service Features Index below.

Factors in Evaluating Small Refiner's Position—Davis Read, x 747.
Factors in the Future of the LP-Gas Industry—William F. Lowe, xi 757.
FALKENS, K.—
(Co-author) Chemical Constitution and Aromatic Groups in Petroleum Lubricants, ii 141; iii 144.
Filtering, vi 532.
Filtration, Continuous Contact, iv 191; Percolation Process, iv 282.
Filtrol Corporation, iv 193; iv 215.
Filtrol Fractionation Process, iv 214.
Finned Tubes, viii 820.
Fire Protection in Natural Gasoline Plants—C. L. Hightower, iv 419.
FISCHER, KERMIT—
The Rotameter and Petroleum Refinery Flow-Rate Measurement, i 30.
Fischer-Tropsch, gas analysis, vi 526.
Flange Design Calculation—Harald E. Lonngren, xi 762.
Flow Diagrams—
Absorption Oil Purifying System (Petro. Engineering), iv 165.
Acetic Acid From Alcohol, iv 167.
Adsorptive Gas Dehydration (Homco), iv 169.
Alkylation Acid Regeneration Process (Chem. Construction), iv 171.
Amine Gas Treating Process (Fluor), iv 363.
Ammonia-Nitric Acid Process (Lion), iv 173.
Atmospheric Unit, i 2.
Attapulgus Clay Company, iv 283.
Aurora Gasoline Company's New Fluid Catalytic Cracking Unit, ix 705.
Azeotropic Distillation Process (Union), iv 175.
Badger Superfractionation Unit, iv 325.
Badger Three Stage Distillation Unit, iv 335.
Barisol Process, iv 307.
Batch still, i 2.
Born Dual-Flo Crude Distillation Unit, iv 203.
Butadiene Process (Standard Development), iv 177.
Butane Isomerization Process (Shell), iv 311.
Caska Corporation's Quitman Gasoline Plant, iv 417.
Catalytic Cracking Unit Drain Systems, vi 523.
Catalytic Section Flow Diagram, viii 99.
Chlorex Extraction Process (Carbide & Carbon), iv 189.
Clay Desulfurization Unit (Gray), iv 227.
Cobalt Molybdate Desulfurization Process, iv 191.
Cold Oil and Gas, Emergency Disposal of, vi 522.
Continuous Contact Filtration Process (Filtrol), iv 193.
De Laval Continuous Acid Treating Plant, iv 195.
Delayed Coking Unit, Torrance Refinery, i 10.
Diethylene Glycol Process for Dehydrating Natural Gas, iv 199.
Donnelly Processing, iv 201.
Dow Styrene Process, iv 207.
Duo-Sol Solvent Extraction Process (Max Miller), iv 205.
Edeleanu Treating Process, iv 209.
Emergency Disposal of Cold Oil and Gas, vi 522.
Emergency Disposal of Hot Oil, vi 520.
Ethylene Production Unit (Stone & Webster), iv 213.
Filtrol Fractionation Process, iv 215.
Fluid Catalytic Cracking, UOP pilot plant, ii 100.
Fluid Catalytic Cracking Pilot-Plant, xi 736.
Fluid Catalytic Cracking Process (Standard Oil Development), iv 219.
Fluid Catalytic Cracking Unit, iii 130.
Fluid Catalytic Unit, Shell Oil Company, Deer Park, ii 68.
Fluid Process, ix 671.
Furfural Refining Unit, iv 221.
Gas absorption-dehydration plant processes, iv 381.
Gas dehydration, iv 409.
Gas-treating plant, vi 538.
Gasoline plant operated without steam, ii 80.
Girbotol Process, iv 225.
Girbotol Unit, xi 740.
Glycol-Amine Gas-treating Plant, vi 538.
High Temperature Clay Desulfurization Unit, iv 185.
Hirgotol Process, iv 247.
Hot Acid Polymerization Process, iv 231.
Hot Oil, Disposal of, vi 520.
Houdry Catalytic Cracking Process Simplified Flow Diagram, iv 235.
Houdry Dehydrogenation Process Simplified Flow Diagram, iv 233.
Houdry Process for Treating Motor Gasoline Simplified Flow Diagram, iv 237.
Howard Treating Process, iv 239.
Hydrocol Process, iv 241.
Hydrogen Production, Flow Sheet of Typical Hydrogenation Unit, iv 245.
Hypersorption Process (Union Oil), iv 249.
Improved UOP Fluid Catalytic Cracking Unit, iv 183.
Indiana Isoforming Process, iv 251.
Instrumentation of Cycling Plants, ix 701.
Kellogg Catalytic Polymerization Unit, iv 197.
Kellogg Delayed Coking Process, iv 197.
Kellogg Fluid Catalytic Cracking Process, iv 217.
Kellogg Hydroforming Process, iv 243.
Light Ends Fractionation and Stabilization (Badger), iv 257.
Linde Copper Sweetening Process, vi 562.
Liquid Phase Paraffin Isomerization Process (Shell), iv 315.
Location of Safety, Valves, Blowdown Lines and Drain Headers, x 732.
Lubricating Oil Manufacturing System (Badger), iv 259.
Lummus Combination Cracking Unit, and Lummus Viscosity Breaker Unit, iv 203.
Lummus Complete Lube Oil Processing System iv 261.
Lummus Ethylene Unit, iv 211; xi 770.
Lummus Gas Concentration Unit, iv 223.
Lummus Lube Oil Return Unit, iv 263.
Lummus Naptha Polyform or Gas Reversion Unit, Lummus Naphtha-Gas Oil Polyform Unit, iv 265.
Lummus Special Naphtha Rerun Unit, iv 323.
